

Concept idea

Stocks Wood walkway

Consisting of a timber walkway set approximately 2.25m off the ground, this would allow visitors to experience the magical qualities of Stocks Wood, with minimal damage to the woodland flora.

It would loop down from higher ground on the corner of Maple Road and Acacia Road, and would allow easy access for wheelchair users.

A particular highlight of the experience would be in Spring and early Summer, when the wood is covered with masses of bluebells.
