

1. The Green

Concept ideas

Sycamore Road - a new space for people

A short stretch of Sycamore Road treated in the design so that it lends itself to be temporarily closed off to vehicles. This would then provide a pedestrian friendly space for a range of community events, including farmer's markets, choir concerts and festivals.

Art on The Green - Art Walk

The 'art walk' is an area of the scheme located alongside the School of Art (former Day Continuation School), featuring a series of structures housing frequently changing exhibits of art work. These could feature works produced by the art students as well as the work of visiting professional artists.

Art on The Green - fashion beacons

Specially designed tapering tubes of toughened glass, housing sculptural forms based on a tailors' dummy. These would feature the work of fashion and textile students at the nearby Birmingham Institute of Art and Design, as well as 'one-off' pieces from international designers. The glass tubes would be illuminated from below to form an enticing arrival point to The Green.
